2. Wenommenon - 27 days

The Dark - 46 days - Arctic winter

Notes about the Moons

There are two moons. The Moon and Silvermoon. Silvermoon only occurs in the month of Silvermoon where the Moon does not show.

Legends tells that in the ages of old, Silvermoon also occurred in the months of Winter hence there was another month of called Silvermoon.

But after The Long Winter (The Time of the White Dragons) there was Silvermoon after 2. Wenommenon no more. Thus The Dark began 19. days earlier.
